Profile

Computer Science engineering student at ENSAF, looking for a **6-month final-year internship (PFE)** in software development. **Full-Stack and Backend Developer** (C#/.NET, Laravel, React, Flutter) with over two years of hands-on experience: production systems, a B2B delivery platform, leading a team of 5 and freelance projects. Solid database skills and working knowledge of DevOps (**Docker**, IIS). Available from January 2027.

Skills

- **Languages:** C#, PHP, TypeScript, JavaScript, Dart, SQL, T-SQL
- **Backend & APIs:** ASP.NET Core, .NET Framework, Laravel, REST API, Entity Framework, ADO.NET, JWT, SignalR, SOLID, design patterns
- **Frontend, Mobile & Desktop:** React, Flutter, WPF, WinForms
- **Databases & Data:** SQL Server, MySQL, PostgreSQL, MongoDB, ETL, SSIS, ERD modeling, SQL optimization, data migration, Power BI
- **DevOps & Tools:** Git, GitHub, Docker, IIS, Linux, Grafana, Prometheus, UML, Trello

Professional Experience

Teltra Connecting Things — Kuwait (Remote)
.NET Backend Developer — *December 2025 – June 2026*

- Maintained and extended **KPTC Garage Management**, a production garage management system (**.NET, SQL Server, JavaScript**): backend APIs, business logic, query optimization.
- Migrated data from the legacy system and deployed on **IIS (Windows Server)**.
- Set up monitoring and observability with **Prometheus and Grafana**.

Collabors Impact – Application Internship (PFA) — Remote
Team Lead & Full-Stack / Mobile Developer — *July – August 2026*

- Led a team of **5 developers**: task coordination and technical design of a B2B delivery platform.
- Built the **Laravel** backend (REST APIs), the **MySQL** database and the **Flutter** mobile app (orders, delivery tracking).

ENSAF – Introductory Internship — Fès, Morocco
Full-Stack Developer — *July 2025*

- Restaurant management system in 40 days: **C# / WinForms (.NET)** desktop app with roles and access control, and a **React** client website.

Projects

Medical Practice Management Platform – Freelance — *ASP.NET Core, SQL Server, SignalR, React*

- Used by over **500 patients**: appointments, payments and PDF invoices, real-time notifications, dashboard.

Gibs (jibs.ma) – Full-Stack Platform and DevOps Deployment — *ASP.NET Core 8, React, Docker*

- Docker Compose stack on a VPS: nginx reverse proxy, HTTPS, monitoring with Prometheus, Grafana and Seq.

Distributed Restaurant Management System (RMS) – Freelance — *ASP.NET Web API, SQL Server, C#*

- REST API with role-based authorization and a desktop client: orders, menu and stock, billing.

Education

National School of Applied Sciences of Fès (ENSAF) — Fès, Morocco
Engineering Degree – Computer Science — *2022 – Present*

Lycée Prince Moulay Hassan — Fès, Morocco
Baccalaureate – Physical Sciences — *2022*
