Profile

Computer Science engineering student at ENSAF, looking for a **6-month final-year internship (PFE)** in software development. **Full-Stack and Backend Developer** (C#/.NET, Laravel, React, Flutter) with over two years of hands-on experience: production systems, a B2B delivery platform, leading a team of 5 and freelance projects. Solid database skills and working knowledge of DevOps (**Docker**, IIS). Available from January 2027.

Skills

- **Backend:** C# / ASP.NET Core, .NET Framework, ADO.NET, Entity Framework, PHP / Laravel, REST APIs, JWT, SignalR, SOLID, design patterns
- **Frontend, Mobile & Desktop:** React, TypeScript, Flutter / Dart, WPF, WinForms
- **Databases:** SQL Server (T-SQL, SSIS), PostgreSQL, MySQL, MongoDB (ERD modeling, SQL optimization, ETL, data migration, Power BI)
- **DevOps & Tools:** Git / GitHub, Docker, Docker Compose, nginx, IIS, Prometheus, Grafana, Seq, Linux VPS, UML

Professional Experience

Teltra Connecting Things — Kuwait (Remote)
Backend Developer — *December 2025 – June 2026*

- Lead maintainer of a production management system (.NET, SQL Server): data migration, IIS deployment, monitoring with Grafana and Prometheus.

Collabors Impact – Application Internship (PFA) — Remote
Team Lead & Full-Stack / Mobile Developer — *July – August 2026*

- Led a team of 5; designed the solution and built the **Laravel** backend, **MySQL** database and **Flutter** mobile app of a B2B delivery platform.

ENSAF – Introductory Internship — Fès, Morocco
Full-Stack Developer — *July 2025*

- Restaurant management system in 40 days: **WinForms (.NET)** desktop app with roles and a **React** client website.

Projects

Medical Practice Management Platform – Freelance — *ASP.NET Core, SQL Server, SignalR, React*

- Used by over **500 patients**: appointments, payments and PDF invoices, real-time notifications, dashboard.

Gibs (jibs.ma) – Full-Stack Platform and DevOps Deployment — *ASP.NET Core 8, React, Docker*

- Docker Compose stack on a VPS: nginx reverse proxy, HTTPS, monitoring with Prometheus, Grafana and Seq.

B2B Delivery Platform – PFA Project — *Flutter, Laravel, MySQL*

- Team lead: design, MySQL database, Laravel backend and mobile application.

KPTC Garage Management System (Teltra) — *.NET, SQL Server, Grafana, Prometheus*

- Lead maintainer: database performance, data migration, monitoring and IIS deployment.

Distributed Restaurant Management System (RMS) – Freelance — *ASP.NET Web API, SQL Server, C#*

- REST API with role-based authorization and a desktop client: orders, menu and stock, billing.

Education

National School of Applied Sciences of Fès (ENSAF) — Fès, Morocco
Engineering Degree – Computer Science — *2022 – Present*

Lycée Prince Moulay Hassan — Fès, Morocco
Baccalaureate – Physical Sciences — *2022*
